PROJECTS

Employee Directory

GitHub Repository: <https://github.com/Emmerz6949/employee-directory>

Deployed Site: <https://emmerz6949.github.io/employee-directory/>

Description: An employee directory React application that allows users to sort employees alphabetically and reverse alphabetically by first name via UI up and down arrows, and to filter the employees by first name, last name, or email address via the search bar.

Workout Tracker

GitHub Repository: <https://github.com/Emmerz6949/workout-tracker>

Deployed Site: <https://frozen-plains-71922.herokuapp.com/>

Description: A workout tracker application that lets users start a new workout or continue the most recent previous workout via storing and retrieving the workout information in the MongoDB “workouts” collection of the “workout” database. Users can use the “Dashboard” tab to view line graphs and pie charts of all the workout data submitted so far.

RECQUE

GitHub Repository: <https://github.com/Emmerz6949/recipeproject>

Deployed Site: <https://emmerz6949.github.io/recipeproject/>

Description: A recipe application that allows users to search for recipes based on allergy or dietary restriction. As a team project, was responsible for using JavaScript and jQuery to create click events that swap assets and store data into local storage.

EDUCATION

Full Stack Web Developer Certificate, The Johns Hopkins University, November 2020.

Cyberjutsu Girls Academy, January 2014 - June 2014.

- Developed a web page using HTML and CSS. Assembled a computer by hand. Gained knowledge of computer components.
